

Following the conclusive formal adoption of the criteria stated above, the supplementary decisions and interpretations detailed below have been drafted in conjunction with the Dutch Society for the Protection of Animals. The decisions/interpretations have not yet been formally adopted and are subject to change before being included in the established BLL criteria. In anticipation thereof, certification may still be carried out

Date	Norm no. or topic	Question	Supplementary decision or interpretation
24-11 17	Processor supplementary BLL certificate	When must a BLL abattoir also hold a BLL certificate for its meat cutting plant/processor?	<p>This depends on the BLL activities that are carried out at the location in question. If the location only slaughters the BLL animals and does not cut the meat, and thus supplies them as BLL carcasses or carcass parts, a BLL certificate for the abattoir alone is sufficient.</p> <p>A location is a processor as well as an abattoir if the BLL carcasses and carcass parts are processed further at the location, including boning, cutting and processing into meat parts or making into composite products. In this case, the location must be certified as a BLL processor as well as a BLL abattoir.</p>
