Declaration

I hereby declare that, as a contracted, veterinary practitioner for this farm:

- The cattle listed above were disbudded at an age of less than two months (horn producing cells in horn bud destroyed by a hot-iron) under anaesthetic and that a subsequent analgesic was administered for up to at least three days after disbudding.

The administration of anaesthetic was performed by myself, the contracted, veterinary practitioner for this farm. The disbudding and administration of analgesic was done under my responsibility.
- The cattle listed above are genetically polled (and have therefore not been disbudded) e.g. due to the use of a polled bull.
